Examiner, Art Unit 3744

DETAILED ACTION

1. This action is in response to the after final amendment filed on 4/15/2011. The amendment has been entered and has placed the claims in condition for allowance.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

- Change the Title to - - HEAT EXCHANGER WITH INLET HAVING A GUIDE - -.

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance:

The prior art does not anticipate nor render obvious the combination set forth in the independent claims, and specifically does not show "a heat exchanger having an inlet header and an outlet header having a refrigerant circulating passage allowing communication between the two headers having an inlet having a closing member and a guide slanting upwardly inwardly of the inlet header, a portion of the refrigerant which passes through the inlet contacting the guide and directed to flow obliquely upward." The closest prior art of record (Higashiyama (U.S. Patent No. 6,923,251 B2) discloses an outlet header with a guide, but not a heat exchanger having an inlet header and an outlet header having a refrigerant circulating passage allowing communication between the two headers having an inlet having a closing member and a guide slanting upwardly inwardly of the inlet header, a portion of the refrigerant which passes through the inlet contacting the guide and directed to flow obliquely upward. Although it is well known

Art Unit: 3744

to provide a guide in a header, there is no teaching in the prior art of record that would, reasonably and absent impermissible hindsight, motivate one having ordinary skill in the art to modify the teachings of the prior art to incorporate a heat exchanger having an inlet header and an outlet header having a refrigerant circulating passage allowing communication between the two headers having an inlet having a closing member and a guide slanting upwardly inwardly of the inlet header, a portion of the refrigerant which passes through the inlet contacting the guide and directed to flow obliquely upward. Thus, for at least the foregoing reasons, the prior art of record neither anticipates nor rendered obvious the present invention as set forth in claim 1.

Further, it is noted that applicant has claimed a specific flow pattern for the fluid within the heat exchanger and the flow pattern of the combined teaching does not meet the claimed limitations.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to BRANDON M. ROSATI whose telephone number is (571)270-3536. The examiner can normally be reached on Monday-Friday 8:00am- 4:30pm EST.
